

Good afternoon,

I am writing to you with regards to Bill #5283. Thank you for the opportunity to share my support for this bill which secures equal funding for agriculture education.

My name is Camryn Sudimick, and I am a student at Nonnewaug High School. Nonnewaug High School has an agriscience program that allows outside towns to send students.

This program has changed my life. I have gained so many leadership experiences from the FFA organization, which I became a member of due to my enrollment in the ag program.

I have also learned more about wildlife and animals, which is amazing because it has led me down my career path in wildlife ecology and conservation.

I ask that you please pass that bill for the sake of me and other students. Thank you.
